

**PERMIT TO ALLOW MINOR USE OF AN AGVET CHEMICAL PRODUCT
FOR PROMOTION OF NUTFALL IN MACADAMIAS.**

PERMIT NUMBER -PER11462

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows any person to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 7 MAY 2009 TO 30 JUNE 2015.

Permit Holder:

AGAWARE CONSULTING P/L ON BEHALF OF HORTICULTURE AUST LTD
21 Rosella Avenue
STRATHFIELDSAYE VIC 3551

Persons who can use the product under this permit:

Persons generally.

CONDITIONS OF USE

Products to be used:

COUNTRY ETHEPHON 480 GROWTH REGULATOR

E-PHON GROWTH REGULATOR

ETHIN GROWTH REGULATOR

K-ETHEPHON GROWTH REGULATOR

Pluse other registered products containing: 480g/L ETHEPHON as their only active constituent.

Directions for Use:

Crop	Purpose	Rate
MACADAMIAS (DO NOT use on variety Teddington)	PROMOTE NUTFALL AFTER MATURITY REACHED	65 - 250 mL /100L-water (refer critical use comments below)

Critical Use Comments:

DO NOT spray trees if they are stressed.

DO NOT spray close to flowering or after flower buds have begun to expand.

Spray at the first sign of natural nut drop. Ethephon is more effective if used when natural abscission has begun. Applications should be made before the end of May.

Add a non-ionic wetter at 20 mL / 100 L(e.g. *Agral Spray Adjuvant*). As an alternative to non-ionic wetter, an adjuvant such as *Spraytech Oil Multipurpose Spray Adjuvant* can be added at 125 mL/100 L-water. Addition of urea at 70 g/100 L-water can be useful for some varieties.

Many varieties require 150 - 200 mL/ 100 L. However, cultivars 842 and 814 seem to be more sensitive and so require a lower rate of 65 - 100 mL / 100 L. The higher rates may be required for colder climates and less responsive cultivars such as A16.

Withholding Period:

DO NOT harvest for 7 days after application.

Jurisdiction:

NSW, QLD, NT & WA only.

Additional Conditions:

THIS PERMIT provides for the use of a product in a manner other than specified on the approved label of the product. Unless otherwise stated in this permit, the use of the product must be in accordance with instructions on its label.

TO AVOID CROP DAMAGE:

The sensitivity of some varieties to be treated under this permit has not been fully evaluated. It is advisable, therefore, to only treat a small number of plants to ascertain their reaction before treating the whole crop.
